OVERVIEW

- - - - X

At the last in-person BSidesSLC conference, we had over 435+ participants and BSidesSLC has been providing a community driven event since 2013. This year our conference will be getting back to its roots by focusing on students and other individuals who have an interest in getting more involved with Cyber Security. We are tailoring a large portion of the event to be friendly to college students through CTF events with prizes and a mentorship program designed to get more first time speakers showing off their research projects at the conference. We are also actively engaging with university professors to draw more students into cyber security careers. BSidesSLC attendees are a mix of security professionals, students, law enforcement, and other IT professionals.
